This Education Pack for 3-7-year-olds was designed to be flexible and enable you to explore the theme of online identity in a way that suits you, the learners and the time you have.

This pack contains:

Lesson plan

Two differentiated lesson plans are provided for learners aged 3-5 years and learners aged 5-7 years. The 3-5 Lesson Plan provides a number of whole group activities, small group activities, and individual activities to allow for a flexible learning environment. The 5-7 Lesson Plan includes a suggested structure for a number of activities that can be adapted to be delivered as one lesson, or across an extended period of time. Each lesson plan is accompanied by an additional supporting presentation.

Assembly

This presentation is designed to take around 15 - 20 minutes to deliver messages around online identity to a larger group of learners. There is also a script for the assembly to guide you and help you deliver the key messages.

Whole school/community activities

These packs offer a great opportunity for young people to deliver online safety messages within their community, whether it be their local area or their school. We have provided some ideas to help you facilitate this.

This pack can be used in different ways depending on how much time young people have to complete activities. The following table gives some ideas on how to use and adapt the different parts of the Education Pack.
