

This Education Pack for 14-18-year-olds was designed to be flexible and enable you to explore the theme of online identity in a way that suits you, the learners and the time you have.

This pack contains:

3 Presentations and scripts

We have created a set of 3 mini presentations, designed to work as a combined lesson and/or assembly. The presentations introduce lots of issues around identity online with questions to facilitate a discussion. There are offline activities available which can be completed with the presentation in a more typical lesson format, or discussions that can take place as an assembly. There is also a script for each presentation to guide you and help you deliver the key messages.

Quick activities

These are activities that can be used alone or to explore issues raised by the presentations in more depth. Some will take between 5 and 10 minutes, whilst others can be extended to fill a 20 or 30 minute period.

Whole school/community activities

These packs offer a great opportunity for young people to deliver online safety messages within their community, whether it be their local area or their school. We have provided some ideas to help you facilitate this.

This pack can be used in different ways depending on how much time young people have to complete activities. The following table gives some ideas on how to use and adapt the different parts of the Education Pack.
